

AAPA's 14th International Flexible Pavements Conference

Sydney
25–28 September 2011

**Topic: WORKSHOP – Enhanced constructability
of unbound granular pavements for thin surfacings**

WORKSHOP FACILITATOR

Position: Lance Midgley

Organisation: AAPA

Aims of Workshop

1. Obtain broader perspective on issues
 2. Review 1st cut comments
 3. Seek consensus on actions
 4. Update status where applicable
 5. Identify high priority further work
-

During Workshop

1. Delegates have ½ hour to review and provide comment on contents of table
2. Nominated scribe will take notes of comments provided
3. Scribes will present summary of main points discussed (5 minutes max.)
4. Delegates are encouraged to submit individual comments - to Lance Midgley

Post Conference

1. An updated table will be prepared
2. AAPA branches and each Jurisdiction will be issued with an updated version of table
3. Seek co-operation between Industry and jurisdictions to resolve issues
4. Where appropriate, seek support to fund unresolved issues: e.g.
 - update best practice guides
 - specification reviews
 - training needs

Table Layout

1. Pavement Design
2. Pavement Materials
3. Pavement Construction
4. Testing
5. Specification
6. Training

Table Layout (Cont)

1. PAVEMENT DESIGN

ISSUE	COMMENT	ACTION	STATUS
1.1 Traffic Volume			
1.2 Road Geometry			
1.3 Traffic Counts			
1.4 Double Seals			
1.5 Axle Config.			
1.6 Seal Design			
1.7 Design Method			

Table Layout (Cont)

2. PAVEMENT MATERIALS

ISSUE	COMMENT	ACTION	STATUS
2.1 Cohesive base 2.2 Durable CR 2.3 SS vs Thin asph. 2.4 Emulsion seals			

During Workshop

1. Delegates have ½ hour to review and provide comment on contents of table
2. Nominated scribe will take notes of comments provided
3. Scribes will present summary of main points discussed (5 minutes max.)
4. Delegates are encouraged to submit individual comments - to Lance Midgley
